SKILLS

- **Languages:** Python, C++, Java, SQL
- **Frameworks:** Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn
- **Tools/Platforms:** Power BI, Excel, Jupyter Notebook, GitHub, PostgreSQL
- **Soft Skills:** Problem-Solving, Team Player, Adaptability, Critical Thinking

PROJECTS

Indian Motorcycle Market Analytics using Power BI | [GitHub](#) December 2025

- Derived insights from 10,000+ used motorcycle listings across India to uncover trends in resale pricing, depreciation, demand distribution, and seller behavior using Microsoft Power BI.
- Performed data cleaning, transformation, and star-schema data modeling, and built interactive dashboards with KPIs, brand & model analysis, and state-wise insights using slicers and cross-filtering.
- Identified high resale value brands, regional demand patterns, and depreciation drivers, highlighting how factors such as engine capacity, mileage, bike age, and seller type influence resale prices.

Tech Used: Power BI, Power Query, DAX, Data Modeling

Crash Reporting and Incident Data Analysis (2019–2023) | [GitHub](#) May 2025

- Analyzed Crash Reporting and Incident Data (2019–2023) from data.gov to identify key trends in crash frequency, severity, and contributing factors using Microsoft Excel.
- Cleaned and processed 25,000+ records, applied advanced Excel functions for data transformation, and built interactive dashboard using PivotTables, Pivot Charts, and slicers to visualize yearly and monthly crash trends.
- Identified a 17% increase in crash incidents, revealed speeding as a major contributing factor, and highlighted urban areas as the highest-risk regions due to dense traffic.

Tech Used: Microsoft Excel, PivotTables, Data Cleaning, Conditional Formatting, Dashboarding

Analysis of Inc5000 Companies (2014) using Python | [GitHub](#) April 2025

- Performed analysis on the Inc5000 (2014) dataset using Python to uncover patterns in industry performance, company growth, revenue distribution, and geographic concentration.
- Processed 5,000 records with Pandas/NumPy and created statistical and visual analyses to study links between growth, revenue, workforce size, and experience.
- Observed that small companies (<100 employees) showed higher growth, Health and IT Services led performance, and revenue had near-zero correlation with growth—indicating diverse growth drivers.

Tech Used: Python, Pandas, NumPy, Matplotlib, Seaborn

TRAINING

Lovely professional university | [Certificate](#) June 2025 – July 2025

Object-Oriented Programming using C++

- Completed certified summer training on Object-Oriented Programming and C++, strengthening core and advanced programming skills.
- Applied core OOP principles to build structured, efficient, and modular applications through hands-on coding.
- Built functional mini-projects (Hospital Management System, File Encryption–Decryption Tool, Student Marks Manager) using file handling for reliable data storage and retrieval.

Tech Used: C++, Visual Studio Code, File Handling, Templates, Inheritance, STL.

CERTIFICATES

- Data Visualization Job Simulation by Tata Group | [Forage](#) November 2025
- Privacy and Security in Online Social Media | [NPTEL](#) April 2025
- Data Structures and Algorithm from | [ImNeo](#) December 2024

ACHIEVEMENTS

- Solved 150+ Data Structures & Algorithms problems on LeetCode | [Leetcode](#) January 2026
- 5 Star rating in SQL on Hacker Rank Platform | [Hacker Rank](#) December 2025

EDUCATION

- **Lovely Professional University** Punjab, India
Bachelor of Technology - Computer Science and Engineering; CGPA: 7.1 August' 23 - Present
- **Narayana Junior College** Andhra Pradesh, India
Intermediate; Percentage: 74.8 April' 22 – March' 23
- **Dr.K.K.R Gowtham School** Andhra Pradesh, India
Matriculation; Percentage: 99 April' 20 – March' 21
